How to Install

- 1) Locate where you have downloaded this pack and unzip it. Information on how to do this can be found [here](#).
- 2) Go to the location where you have extracted the files from the .zip file.
- 3) Now find the .exe file called 'Vegetation Enhancement Pack'. Double-click this file.
- 4) Follow the steps and by the end of the process, this pack will have installed.

Recommended Settings

To keep the shimmering effect to a minimum that comes with high resolution vegetation, please ensure you have 'Shadow Quality' set to its highest within your in-game Graphics settings. It is also recommended to use at least 2x2 SSAA antialiasing.

Features

- 62 individual 3D bush & tree assets representing a variety of deciduous and evergreen species
- Lines and groups of assets to assist in placement
- Optimised so as to not affect frame rates (FPS) compared to existing 3D assets
- Seasonal visuals for summer, autumn, spring & winter
- No 'popping' effect as you move closer/further away from the assets

How to Use in the Route Editor

To use these new assets in your own route, please do the following:

- 1) In the left-hand asset selection fly-out, click the object set filter which looks like a blue box with an orange arrow to the right of it.
- 2) Go to the right-hand fly-out which should have appeared. Select 'AP' from the drop-down menu.
- 3) Tick the first & third box beside 'VegEP'.
- 4) Click the tree 'Foliage/Water' icon in the left-hand asset selection fly-out. The assets will be visible with an 'AP' prefix.
